## Appendix N

## Sample Reports - MCAS

## What is the MCAS Alternate Assessment (MCAS-Alt) Portfolio?

Your child's portfolio may include samples of his or her school work, videos, photographs, and charts of the student's progress over time in the subject being assessed. Students taking the MCAS-Alt may work on knowledge and skills at lower levels of difficulty than their peers, though this is not always the case. Each portfolio matches the subjects that are assessed by the standard MCAS tests.

Spring 2017 MCAS
Alternate Assessment (MCAS-Alt) Parent/Guardian Report
All students in grades 3-10 who attend publicly funded school programs are required to participate in statewide assessments. A relatively small All students in grades 3-10 who attend publicly funded school programs are required to participate in statewide assessments. A rel
number of students with disabilities take the MCAS-Alt if they are unable to take regular MCAS tests, even with accommodations. The decision to participate in an alternate assessment is made each year in each subject by the student's IEP team, of which parents are an important member. Or it may be included in a student's 504 plan. Most students who take the alternate assessment receive individualized instruction that has been substantially modified from the instruction other students receive. Please also be aware that participation in the MCAS-Alt may eventually delay, or otherwise affect, your child's ability to earn a high school diploma.

## Why include students with disabilities in the MCAS and MCAS-Alt?

It's the law. State and federal laws require the participation of all students in statewide assessments. The alternate assessment allows students with significant disabilities who cannot take regular MCAS tests to "show what they know" and to receive instruction at a level that is hallenging and attainable.
The MCAS helps to determine how much a student is learning. An MCAS-Alt portfolio shows what the student has learned during the school year. Scores provide accurate and detailed feedback that can be used to identify challenging goals and instruction.
Including all students in a school's or district's test results ensures that all students will be taught. Counting the results of students who take the MCAS-Alt means that those students are more likely to be considered when resource decisions are made.
As learning improves, expectations are raised. Evidence indicates that students learn more than expected when they are engaged in instruction based on the state's learning standards, and when they participate in assessments based on those learning standards. The MCAS-Alt also provides an alternative pathway for some high school students with disabilities to earn a Competency Determination and be eligible to receive a high school diploma.

## How are the MCAS-Alt results used?

MCAS-Alt results should be used by the school and the IEP team to:

- make decisions about a student's daily instruction
- identify challenging academic goals and plan instruction for a student
- measure a student's progress in achieving the academic standards in the Massachusetts Curriculum Framework
- allocate sufficient school resources for a student's educatio
- establish whether the school and district are making progress in educating students with disabilities.

## Can students meet the state's graduation requirement and earn a diploma if they participate in the MCAS-Alt?

 A student must meet both state and local requirements in order to graduate. However, only a small number of students who participate in the MCAS-Alt have been able to meet the state's graduation requirement.In order to meet the state's graduation requirement by taking the MCAS-Alt, a student must submit a "competency portfolio" that

- demonstrates the student's knowledge and skills at a grade 10 level of performance;
- includes independently produced work samples that address the required high school learning standards.

These requirements are described in the Educator's Manual for MCAS-Alt, which is available at www.doe.mass.edu/mcas/alt/resources.html.

## Letter from the Commissioner

Dear Parent or Guardian:
Enclosed are your child's scores from the 2017 MCAS Alternate Assessment (MCAS-Alt). All students were required to participate in either the MCAS or MCAS-Alt. Your child took the MCAS-Alt, as indicated in his or her IEP or 504 plan. The MCAS-Alt is a portfolio of your child's work, based on the Massachusetts Curriculum Frameworks, and was submitted to the state last spring. Your child's school was required to invite you to review the portfolio before it was submitted. Your support is extremely important, and I hope you were able to view the portfolio, and observe your child's progress.

Please meet with your child's teacher to help you understand the meaning of these results, and to discuss your child's goals for the coming school year
I would like to acknowledge the hard work of your child's teachers in creating the portfolio and contributing to this important and worthwhile effort.

Sincerely,
Teff Wabson
Jeff Wulfson
Acting Commissioner of Elementary and Secondary Education

## Purposes of the MCAS-Alt

The MCAS-Alt is an assessment designed for students with significant disabilities to measure achievement in selected areas of English Language Arts and Mathematics in grades 3-8 and 10, and in Science and Technology/Engineering in grades 5, 8, and high school. Your child was expected to demonstrate knowledge of the state's learning standards at a level that was challenging and appropriate.

The purpose of the MCAS-Alt is to make sure schools are teaching the standards to al/students regardless of their disability, even when they cannot show what they know on a standard test.

Achievement Level Descriptors
A score of Needs Improvement, Proficient, or Advanced on the high school MCAS-Alt is required to meet the state's graduation requirement.
Advanced Students at this level demonstrate a comprehensive understanding of challenging grade-level subject matter and provide sophisticated solutions to complex problems.
Proficient Students at this level demonstrate a solid understanding of challenging grade-level subject matter and solve a wide variety of problems.
Needs
Improvement
Progressing
tudents at his level demonstrate a partial understanding of grade-level subject matter and solve some simple problems.
Students at this level demonstrate a partial understanding below grade-level expectations of selected learning standards and core knowledge topics contained in the Massachusetts curriculum framework for the content area. Students are steadily learning new knowledge, skills, and concepts. Students require minimal prompting and assistance, and their performance is basically accurate. Students at this level demonstrate a simple understanding below grade-level expectations of a limited number of learning standards and core knowledge topics contained in the Massachusetts
Emerging curriculum framework for the content area. Students require frequent prompting and assistance, and their performance is limited and inconsistent.
Students at this level demonstrate very little understanding of learning standards and core knowledge topics contained in the Massachusetts curriculum framework for the content area. Students require extensive prompting and assistance, and their performance is mostly inaccurate.

Incomplete Insufficient evidence and information was included in the portfolio to allow an achievement level to be determined in the content area

The top section of this report shows your child's overall achievement level in the content area of the alternate assessment.

The MCAS Alternate Assessment (MCAS-Alt) portfolio was scored in each area shown below. Scores in Level of Complexity, Demonstration of Skills and Concepts, and Independence were combined to give the overall achievement level.

## MCAS-Alt Scoring Areas and Your Child's Scores

## Level of Complexity - How your child addressed the learning standards in each subject

5 - Student addresses a broad range of curriculum framework learning standards (three or more) at grade-level expectations in this strand.
4 - Student addresses a narrow sample of curriculum framework learning standards (one or two) at grade-level expectations in this strand.
3 - Student addresses curriculum framework learning standards that have been modified below grade-level expectations in this strand.
2 - Student primarily addresses social, motor, and communication "access skills" during instruction based on curriculum framework learning standards in this strand 1 - Portfolio strand reflects little or no basis in, or is unmatched to, curriculum framework learning standard(s) required for assessment.
Demonstration of Skills and Concepts - The percentage of accurate (correct) responses
4 - Student's performance is accurate and is of consistently high quality in this strand (76-100\% accurate).
3 - Student's performance is mostly accurate and demonstrates some understanding in this strand (51-75\% accurate).
2 - Student's performance is limited and inconsistent with regard to accuracy and demonstrates limited understanding in this strand ( $26-50 \%$ accurate). 1 - Student's performance is primarily inaccurate and demonstrates minimal understanding in this strand ( $0-25 \%$ accurate). M - The portfolio strand contains insufficient information to determine a score.
Independence - The amount of assistance your child received
4 - Student requires minimal verbal, visual, and physical assistance to demonstrate skills and concepts in this strand ( 76 -100\% independent) 3 - Student requires some verbal, visual, and physical assistance to demonstrate skills and concepts in this strand ( $51-75 \%$ independent). 2 - Student requires frequent verbal, visual, and physical assistance to demonstrate skills and concepts in this strand ( $26-50 \%$ independent). 1 - Student requires extensive verbal, visual, and physical assistance to demonstrate skills and concepts in this strand ( $0-25 \%$ independent). M - The portfolio strand contains insufficient information to determine a score.
Self-Evaluation - Your child's awareness of his or her performance
2 - Student self-corrects, monitors, sets goals, and reflects in this content area - multiple examples of self-evaluation were found in this strand. 1 - Student infrequently self-corrects, monitors, sets goals, and reflects in this content area - only one example of self-evaluation was found in this strand. M - Evidence of self-correction, task-monitoring, goal-setting, and reflection was not found in the student's porffolio in this content area. Generalized Performance - The number of approaches used by your child to demonstrate knowledge and skills
2 - Student demonstrates knowledge and skills in multiple contexts, or uses multiple approaches and/or methods of response and participation in this strand. 1 - Student demonstrates knowledge and skills in one context, or uses one approach and/or method of response and participation in this strand.
